Dear Sir:

Responsive to the Restriction Requirement dated June 23, 2005,
Applicant responds as follows:

I. Election of Group

The Applicant hereby elects, without traverse, Group I, claims 1-17.

II. Election of Species

The Applicant hereby elects, with traverse, Species A, which the Examiner has correlated with Figures 1 and 2. In this regard, all of the claims of Group 1, namely, claims 1-17, read on the elected species. The assertion that all elected claims read on the elected species can be confirmed by referring to the specification where it is stated numerous times that the elastic member depicted in Figures 1 and 2 can include many different mechanisms for achieving the recited elasticity, including many of the mechanisms depicted in other drawing figures.
